Data

The credit data used in this project includes both categorical and quantitative data.

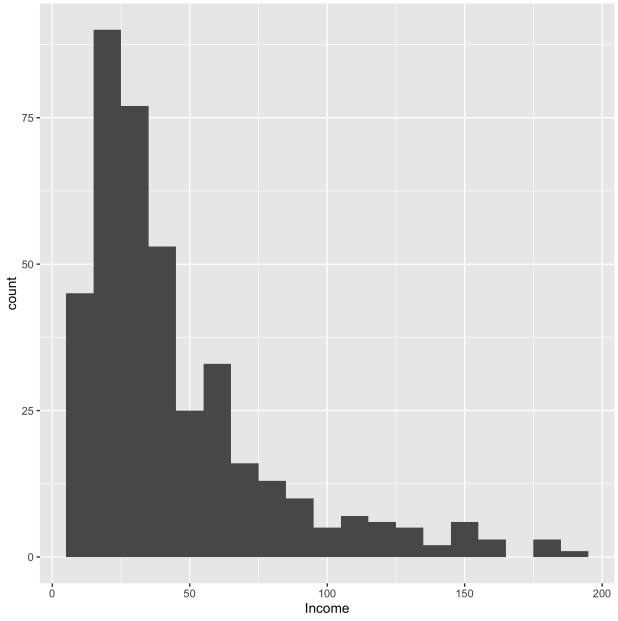
Categorical variables include

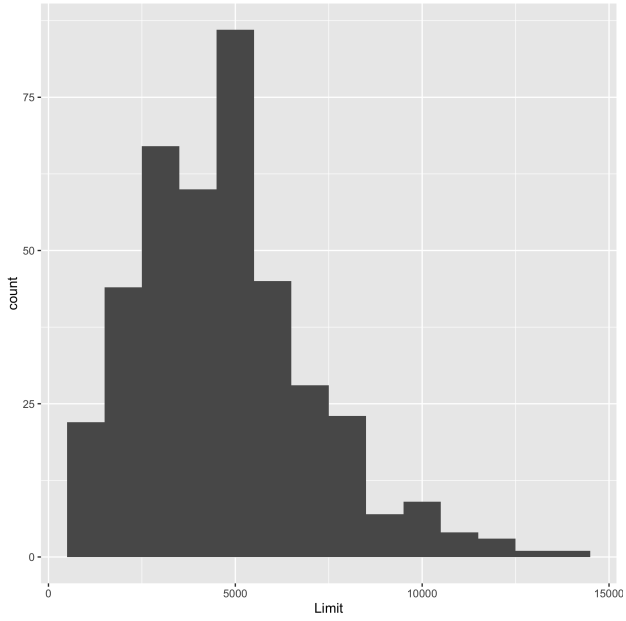
- Gender: Female or Male
- Student: Yes or No
- Married: Yes or No, and
- Ethnicity: African, American, Asian, or Caucasian

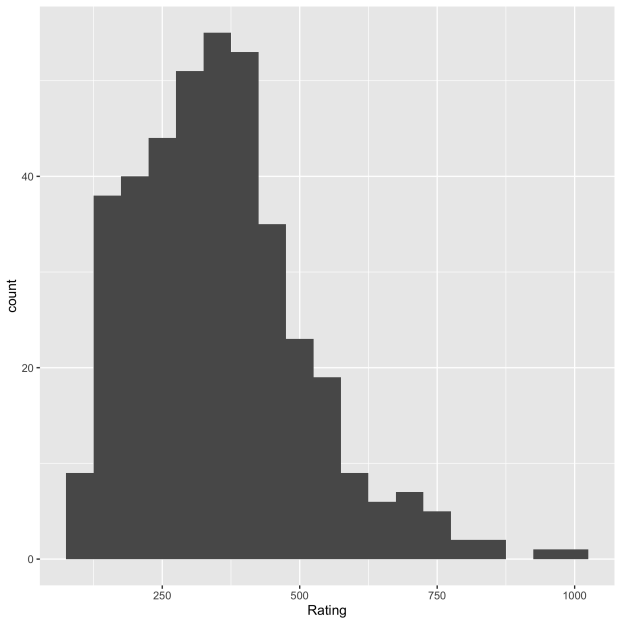
Quantitative variables are

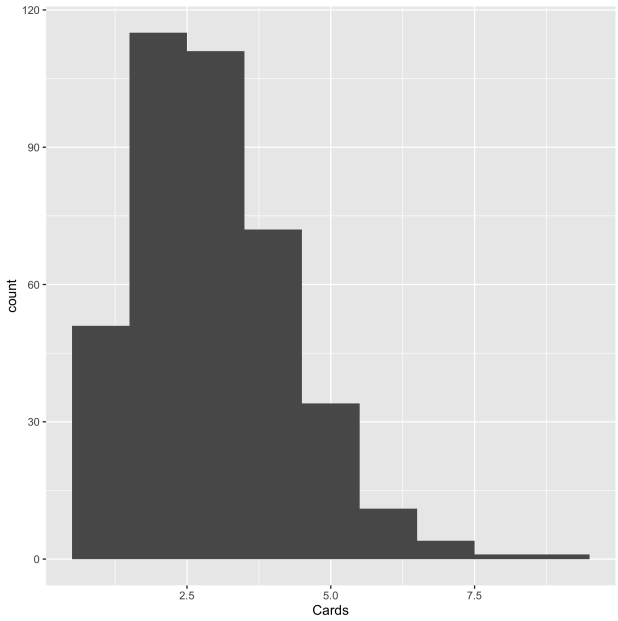
- Income
- Limit
- Rating
- Cards: Number of Credit Cards
- Age
- Education(years), and
- Balance

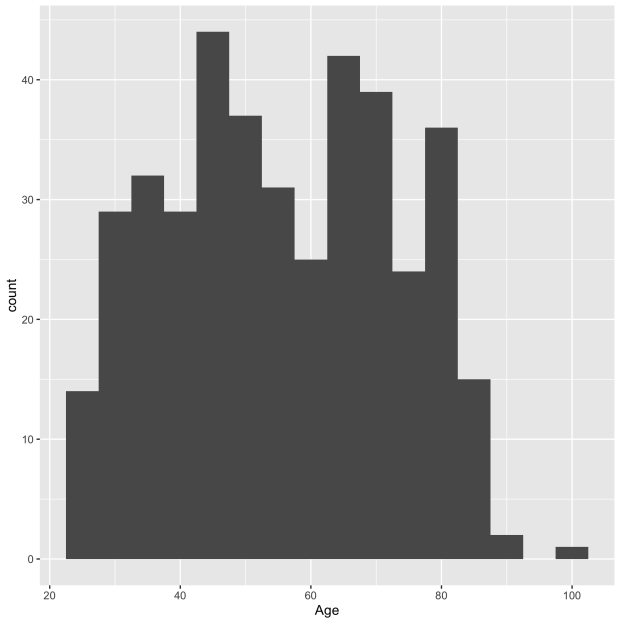
Distribution of quantitative variables is shown below in Figure 1.

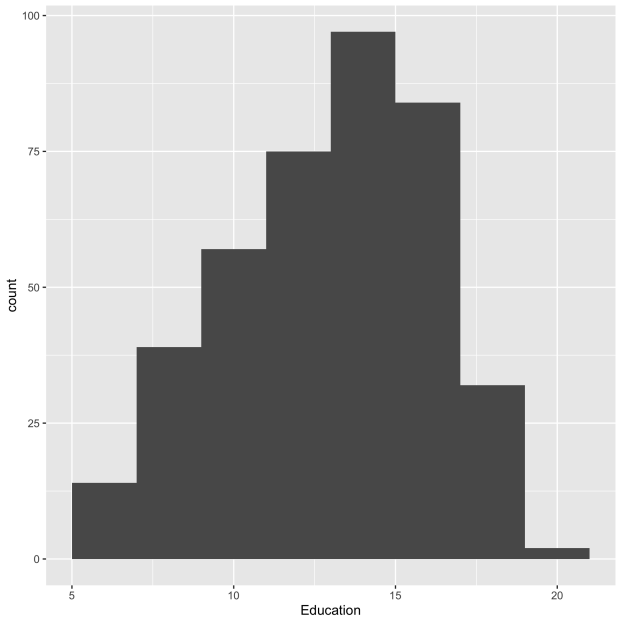












Below is the histogram showing the distribution of Balance:
